## Background and Experience

Please briefly present the organisation/group (e.g. its type, scope of work, areas of activity and if applicable, approximate number of paid/unpaid staff, learners and members of the group).

Algoritmo Associates has been working for over twenty years in the translations sector and more than 2 years in language support to the migrant community. We are a small and medium sized enterprise. We work with 2 internal resources, 2 external collaborators and both freelancers and volunteers.

As regards the latter, we have been working both in the development of technical solutions that are capable of supporting communication between migrants and European (and other) interlocutors and in providing consultancy and training to these interlocutors. In this regard we have a wide network of links to many structures, large and small, that are engaged in the receiving and supporting migrant communities. Also connected to these activities is training people to have greater awareness of interlinguistic communication. In this regard we have trained the health personnel of several outpatient structures, teaching and non-teaching staff in various schools, and operators of coops and of organisations that support the living arrangements for migrants, etc.
